

LOGESHWARAN R S

Cloud Support Engineer Aspirant | AWS Cloud Foundations Certified | Cloud Infrastructure Fresher

Erode, Tamil Nadu, India | +91 9514336059 | logeshwaranrs@gmail.com | logeshwaren.netlify.app | www.linkedin.com/in/logesh-r-s-173a96289

PROFESSIONAL SUMMARY

M.Sc. Computer Science student with AWS Cloud Foundations certification and a certified AWS Cloud Internship covering web server deployment and cloud infrastructure management. Hands-on practice with core AWS services including EC2, VPC, VPC Peering, and IAM, along with cloud infrastructure concepts such as load balancing, geo-location routing, and failover. Working knowledge of Python and Git, with a troubleshooting mindset built through independent project deployment and internship exposure. Seeking a Cloud Support Engineer / AWS Cloud Support role to apply foundational AWS and infrastructure troubleshooting skills.

TECHNICAL SKILLS

Cloud & AWS (Hands-on Practice): AWS Cloud Foundations (Certified), Amazon EC2, Amazon VPC, VPC Peering, AWS IAM, Load Balancing, Geo-location Routing, Failover Concepts, Cloud Application Deployment

Networking & Infrastructure: Networking Fundamentals, VPC Networking, Troubleshooting Mindset

Programming: Python, C++, JavaScript

Web Technologies: HTML5, CSS3, Responsive Design

IoT & Embedded: IoT Device Integration, Bluetooth Serial Communication, Embedded Systems

Tools & Version Control: Git, VS Code, Figma, Arduino IDE

AWS CLOUD HANDS-ON PRACTICE

Self-directed lab exercises and internship-guided practice (not production/professional deployment experience)

- Practiced launching and configuring Amazon EC2 instances as part of hands-on cloud infrastructure exercises
- Built and configured Amazon VPC environments, including subnets and VPC Peering connections between networks
- Applied AWS IAM concepts for user, role, and permissions management in lab environments
- Explored load balancing setups along with geo-location routing and failover concepts for cloud infrastructure resilience

INTERNSHIP EXPERIENCE

AWS Cloud Internship — Nminds Academy

5 Jun 2026 – 27 Jun 2026

- Completed a certified hands-on internship in Amazon Web Services (AWS), covering web server application deployment and cloud infrastructure management fundamentals
- Worked as part of a team under mentor guidance while applying AWS and cloud infrastructure concepts introduced during the program

PROJECTS

Vizha App — Cloud-Deployed Event Management Web Application

vizhaapp.netlify.app

- Built and deployed a fully responsive event management web application, hosted and maintained in a live, publicly accessible state
- Designed the registration flow, event listing, and navigation with a mobile-first approach using HTML5, CSS3, and JavaScript
- Managed source updates through Git and handled deployment/hosting maintenance for the live application

Developer Portfolio Website

logeshwaren.netlify.app

- Designed, built, and deployed a personal portfolio website from scratch to showcase projects and certifications, optimized for performance and cross-browser compatibility

Bluetooth-Controlled Wireless Notice Board — IoT System

- Engineered an IoT notice board that receives and displays messages from an Android device over Bluetooth in real time
- Programmed an Arduino microcontroller to interface with a MAX7219 LED matrix driver, handling serial communication and dynamic text rendering
- Replaced manual notice updates with wireless message broadcasting across a room-scale environment

CERTIFICATIONS

- AWS Cloud Foundations — Amazon Web Services
- AWS Cloud Internship Certificate — Nminds Academy (June 2026)
- Python Programming Certification
- Hardware Workshop Certification

EDUCATION

M.Sc. Computer Science

2025 – 2027 (Pursuing)

VET Institute of Arts and Science (Bharathiar University), Erode | CGPA: 7.7 / 10

B.Sc. Computer Science with Data Analytics

May 2025

Kongu Arts and Science College (Autonomous), Erode | CGPA: 7.0 / 10
